### 29 July 2019 Revision Number: 3.0 Last updated 1. Product and Company Identification Product Name: Beta-Amyloid (23-42), Human, mouse/rat H - DVG SNK GAI IGL MVG GVV IA - OH Manufacturer/Supplier: AnaSpec, Inc. www.anaspec.com 34801 Campus Drive Fremont, CA 94555 Tel: 510-791-9560 Fax: 510-791-9572 Email: service@anaspec.com Kaneka Eurogentec SA, Rue du Bois Saint Jean 5 4102 Seraing Belgium Tel. +32-4-3727400 Fax. +32-4-3727500 E-mail info@eurogentec.com Kaneka Eurogentec Helpdesk Tel. +32-4-3727665 Catalog Number AS-62766 Relevant identified uses of the For laboratory use only. substance/preparation and uses advised against Emergency information Please contact the regional Eurogentec representation in your country or Kaneka Eurogentec S.A. directly (from 8 am to 6 pm) 2. Hazards Identification

# Safety Data Sheet (SDS)

*Emergency Overview:* We do recommend handling all chemicals with caution. Use proper protective equipment (PPE) when handling chemicals. To our knowledge, the hazards of this material have not been thoroughly investigated.

GHS Hazard Classification:

GHS Physical Hazards:Not a dangerous substance according to the GHSGHS Health and Environmental Hazards:Not a dangerous substance according to the GHS

GHS Signal Words: None

GHS Hazard Statements: None

GHS Precautionary Statements: None

Potential Health Effects for:

*Inhalation:* If inhaled, remove to fresh air. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Good hygiene practice requires that exposure be kept to a minimum and that suitable control measures be used in an occupational setting.

Ingestion: If swallowed, wash out mouth with water provided person is conscious. Call a physician.

Skin: In case of contact, immediately wash skin with soap and copious amount of water.

Eyes: In case of contact, immediately flush eyes with copious amounts of water for at least 15 minutes.

Chronic Exposures: No information available. We recommend limiting prolonged exposure.

Target Organs: No information available

HMIS Classification

Health hazard: 0 Chronic Health Hazard: 0 Flammability: 0 Physical hazards: 0

NFPA Rating

Health hazard: 0 Fire: 0 Reactivity Hazard: 0

| 3. Compositi  | <u>on</u>   |  |
|---------------|---|--|
| Ingredients/C | omponents:  |  |
| Chemical No   | ame: Beta-Amyloid (23-42), Human, mouse/rat<br>H - DVG SNK GAI IGL MVG GVV IA - OH  |  |
|               | Molecular formula: NA<br>Molecular weight: 1870.4<br>CAS-No NA<br>EC-No NA  |  |
| 4. First Aid  | Measures  |  |
| Inhalation:   | If dust is inhaled, remove from contaminated area.  |  |
|               | Encourage patient to blow nose to ensure clear passage of breathing.<br>If irritation or discomfort persists seek medical attention.  |  |
| Ingestion:    | If swallowed do <b>NOT</b> induce vomiting.<br>If vomiting occurs, lean patient forward or place on left side (head-down position, if possible) to maintain open airway and prevent aspiration.<br>Observe the patient carefully.<br>Give water to rinse out mouth, then provide liquid slowly and as much as casualty can comfortably drink.<br>Seek medical advice. |  |
| Skin:         | If skin or hair contact occurs:   Flush skin and hair with running water (and soap if available).   Seek medical attention in event of irritation.  |  |
| Eyes:         | If this product comes in contact with the eyes:<br>Wash out immediately with fresh running water.<br>Ensure complete irrigation of the eye by keeping eyelids apart and away from eye and moving the<br>eyelids by occasionally lifting the upper and lower lids.<br>If pain persists or recurs seek medical attention.   |  |

| Extinguishing media:    |   | Water spray or fog.   |
|-------------------------|---|---|
| Exinguishing meata:     |   | Alcohol resistant foam.   |
|                         |   | Dry chemical powder.  |
|                         |   | BCF (where regulations permit).   |
|                         |   | Carbon dioxide  |
|                         |   |   |
| Special firefighting pr | ocedures:   | Alert Emergency Responders and tell them location and nature of                               |
|                         |   | hazard.   |
|                         |   | Wear breathing apparatus plus protective gloves.  |
|                         |   | Prevent, by any means available, spillage from entering drains or water                       |
|                         |   | course.   |
|                         |   | Use water delivered as a fine spray to control fire and cool adjacent area.                   |
|                         |   | <b>DO NOT</b> approach containers suspected to be hot.  |
|                         |   | Cool fire exposed containers with water spray from a protected location                       |
|                         |   | If safe to do so, remove containers from path of fire.  |
|                         |   | Equipment should be thoroughly decontaminated after use.                                      |
|                         |   | Equipment should be thoroughly decontaininated after use.                                     |
| Unusual fire and explo  | osions hazards:                                       | Emits toxic fumes under fire conditions   |
| 6. Accidental Releas    |   |   |
| Spill response          |   | ll ignition sources.  |
|                         |   | ll spills immediately.  |
|                         |   | tact with skin and eyes.  |
|                         |   | rsonal contact by using protective equipment.<br>ean up procedures and avoid generating dust. |
|                         |   | suitable, labeled container for waste disposal  |
| Containment             |   | personal contact, including inhalation.   |
|                         |   | ective clothing when risk of exposure occurs.   |
|                         | Use in a w  | ell-ventilated area.  |
|                         | DO NOT o  | enter confined spaces until atmosphere has been checked.                                      |
|                         |   | allow material to contact humans, exposed food or food utensils.                              |
|                         |   | tact with incompatible materials.   |
|                         |   | dling, DO NOT eat, drink or smoke.  |
|                         |   | ainers securely sealed when not in use.   |
|                         |   | sical damage to containers.   |
|                         | Always wash hands with soap and water after handling. |   |
|                         |   | occupational work practice.   |
|                         |   | tainers may contain residual dust which has the potential to accumulate                       |
|                         |   | settling. Such dusts may explode in the presence of an appropriate ignition                   |
|                         | source.<br>Do NOT c                                   | ut, drill, grind or weld such containers  |
| PPE                     | Use persor  | nal protective equipment  |
|                         | person  | T THE TRANSPORT   |
|                         |   |   |
| 7. Handling and Stor    | rage  |   |
|                         |   | ted from light. Store away from oxidizing agent.  |

Γ

Store at -20 °C, dry desiccated and protected from light. Store away from oxidizing agent.

| Engineering controls | Local exhaust ventilation is required where solids are handled as powders or crystals;  |
|----------------------|---|
| 0                    | even when particulates are relatively large, a certain proportion will be powdered by mutual friction.  |
|                      | Exhaust ventilation should be designed to prevent accumulation and re-circulation of particulates in the workplace.   |
|                      | If in spite of local exhaust an adverse concentration of the substance in air could occur, respiratory protection should be considered. Such protection might consist of:   |
|                      | <ul><li>(a): particle dust respirators, if necessary, combined with an absorption cartridge;</li><li>(b): filter respirators with absorption cartridge or canister of the right type;</li><li>(c): fresh-air hoods or masks</li></ul> |
|                      | Build-up of electrostatic charge on the dust particle, may be prevented by bonding and grounding.   |
|                      | Powder handling equipment such as dust collectors, dryers and mills may require additional protection measures such as explosion venting.   |
|                      | Air contaminants generated in the workplace possess varying "escape" velocities which,  |
|                      | in turn, determine the "capture velocities" of fresh circulating air required to efficiently remove the contaminant.  |
| PPE                  | Use personal protective equipment   |

# 9. Physical and Chemical Properties

Γ

| Physical State      | Solid         |  |
|---------------------|---------------|--|
| Odour               | Not available |  |
| Solubility in Water | Not available |  |
| Specific Gravity    | Not available |  |
| pН                  | Not available |  |
| Boiling Point       | Not available |  |
| Melting Point       | Not available |  |
| Flash Point         | N/A           |  |
| Vapor Pressure:     | N/A           |  |
| Vapor Density:      | N/A           |  |

## 10. Stability and Reactivity

| No data available    |
|----------------------|
| No data available    |
| COx, NOx when burned |
|                      |

Keep container tightly closed in a dry well-ventilated place. Store in -20 °C, dry refrigerator.

#### **11. Toxicological Information**

| RTECS Number | N/A                       |
|--------------|---------------------------|
| Toxicity     | No information available. |

| Health Hazards                            | Although ingestion is not thought to produce harmful       |
|---|--|
|   | effects, the material may still be damaging to the         |
|   | health of the individual following ingestion, especially   |
|   | where pre-existing organ (e.g. liver, kidney)              |
|   | damage is evident. In an occupational setting however,     |
|   | ingestion of insignificant quantities is not thought to be |
|   | cause for concern.   |
| Potential Hazards                         | Not available  |
| Carcinogenicity:                          | No significant acute toxicological data identified         |
| OSHA Permissible Exposure Limit(PEL) Data | N/A  |
| ACGIH Threshold Limit Values (TLV)        | N/A  |

Reproductive Toxicity:

No information available

#### 12. Ecological Information

No information available.

#### **<u>13. Disposal Considerations</u>**

All waste must be handled in accordance with local, state and federal regulations. Legislation addressing waste disposal requirements may differ by country, state and/ or territory. Each user must refer to laws operating in their area. In some areas, certain wastes must be tracked.

#### 14. Transport Information

| Hazard Class               | N/A |
|----------------------------|-----|
| Identification Number      | N/A |
| Packing Group              | N/A |
| Proper Shipping Name (DOT) | N/A |

#### 15. Regulatory Information

California Proposition 65: N/A US TSCA (Toxic Substance Control Act): N/A US CERCLA (Comprehensive Environmental Response, Compensation, and Liability Act: N/A US SARA Title III (Superfund Amendments and Reauthorization Act: N/A US Other: N/A

EC EINICS (European Inventory of Existing Commercial Chemical Substances) Number: N/A

EC Risk Statements: N/A

Other Country Regulations: N/A

#### 16. Other Information

It is not intended for food, drug, household, agricultural or cosmetic use. A technically qualified individual experienced in handling potentially hazardous chemicals must supervise its use. The above information is believed

to be correct but does not purport to be all inclusive and shall be used only as a guide. Users should make independent decisions regarding completeness of the information based on all sources available. AnaSpec shall not be held liable for any damage resulting from handling or from contact with the above product.
