Safety Data Sheet (SDS)

Revision Number: 3.0		Last updated March 18, 20
1. Product and Company Iden	ntification_	
Product Name:	6-HEX Aci	d;
	[6 - carboxy	- 2',4,4',5',7,7' - hexachlorofluorescein]
Manufacturer/Supplier:	AnaSpec, Inc	2.
	www.anaspec.com	
	34801 Camp	us Drive
	Fremont, CA	94555
	Tel: 510-791	-9560
	Fax: 510-792	1-9572
	Email: service@anaspec.com	
Catalog Number	AS-81019	
Unit Size	25g	

2. Hazards Identification

Emergency Overview: We do recommend handling all chemicals with caution. Use proper protective equipment when handling chemicals.

GHS Hazard Classification:

GHS Physical Hazards 2

GHS Health and Environmental Hazards: Specific target organ toxicity- single exposure 3

GHS Signal Words: Irritant

GHS Hazard Statements: H315 Causes skin irritation

H319 Causes serious eye irritation H335 May cause respiratory irritation

3, Maybe harmful if swallowed or in contact with skin.

GHS Precautionary Statements: P261 Avoid breathing dust/fume/gas/ mist/vapor/spray

P305+P351+P338: IF IN THE EYE; rinse cautiously with copious amounts of

Water.

Potential Health Effects for:

Inhalation: If inhaled, remove to fresh air. If not breathing, give artificial respiration. If breathing is difficult, give

oxygen. Good hygiene practice requires that exposure is avoided and that suitable control

measures be used in an occupational setting.

Ingestion: If swallowed, wash out mouth with water provided person is conscious. Call a physician.

Skin: In case of contact, immediately wash skin with soap and copious amount of water.

Eyes: In case of contact, immediately flush eyes with copious amounts of water for at least 15 minutes.

Chronic Exposures: No information available. We recommend limiting prolonged exposure.

Target Organs: Single exposure category 3

3. Composition

Ingredients/Components:

Chemical Name: 6-HEX Acid; [6 - carboxy - 2',4,4',5',7,7' - hexachlorofluorescein]

Molecular formula: $C_{21}H_6Cl_6O_7$

Molecular weight: 583.0

CAS-No N/A EC-No N/A

4. First Aid Measures

Inhalation:	If dust is inhaled, remove from contaminated area.			
	Encourage patient to blow nose to ensure clear passage of breathing.			
	If irritation or discomfort persists seek medical attention.			
Ingestion:	If swallowed do NOT induce vomiting.			
	If vomiting occurs, lean patient forward or place on left side (head-down position, if possible) to			
	maintain open airway and prevent aspiration.			
	Observe the patient carefully.			
	Give water to rinse out mouth, then provide liquid slowly and as much as casualty can comfortably			
	drink.			
	Seek medical advice.			
Skin:	If skin or hair contact occurs:			
	Flush skin and hair with running water (and soap if available).			
	Seek medical attention in event of irritation.			
Eyes:	If this product comes in contact with the eyes:			
	Wash out immediately with fresh running water.			
	Ensure complete irrigation of the eye by keeping eyelids apart and away from eye and moving the			
	eyelids by occasionally lifting the upper and lower lids.			
	If pain persists or recurs seek medical attention.			

course.	5. Fire Fighting Meas		
Dry chemical powder. BCF (where regulations permit). Carbon dioxide Alert Emergency Responders and tell them location and nature of hazard. Wear breathing apparatus plus protective gloves. Prevent, by any means available, spillage from entering drains or course. Use water delivered as a fine spray to control fire and cool adjacet area. DO NOT approach containers suspected to be hot. Cool fire exposed containers with water spray from a protected location. If safe to do so, remove containers from path of fire. Equipment should be thoroughly decontaminated after use. Unusual fire and explosions hazards: Emits toxic fumes under fire conditions 6. Accidental Release Measures Spill response Remove all ignition sources. Clean up all spills immediately. Avoid contact with skin and eyes. Control personal contact by using protective equipment. Use dry clean up procedures and avoid generating dust. Place in a suitable, labeled container for waste disposal Containment Avoid all personal contact, including inhalation. Wear protective clothing when risk of exposure occurs. Use in a well-ventilated area. DO NOT enter confined spaces until atmosphere has been checked. DO NOT allow material to contact humans, exposed food or food utensils. Avoid contact with incompatible materials. When handling, DO NOT eat, drink or smoke. Keep containers securely sealed when not in use. Avoid physical damage to containers. Always wash hands with soap and water after handling. Use good occupational work practice. Empty containers may contain residual dust which has the potential to accumu following settling. Such dusts may explode in the presence of an appropriate ignition source. Do NOT cut, drill, grind or weld such containers	Extinguishing media:		
Special firefighting procedures: Alert Emergency Responders and tell them location and nature of hazard. Wear breathing apparatus plus protective gloves. Toxicity

No information available.

Although ingestion is not thought to produce harmful
effects, the material may still be damaging to the
health of the individual following ingestion, especially
where pre-existing organ (e.g. liver, kidney)
damage is evident. In an occupational setting however,
ingestion of insignificant quantities is not thought to be
cause for concern.
