	Tel. +32-4-3727665		
Catalog Number	AS-26856-F	025	

2. Hazards Identification

Emergency Overview: We do recommend handling all chemicals with caution. Use proper protective equipment when handling chemicals. To our knowledge, the hazards of this material have not been thoroughly investigated.

GHS Hazard Classification: Not a hazardous substance or mixture

GHS Physical Hazards: Not a hazardous substance or mixture

GHS Health and Environmental Hazards: Not a hazardous substance or mixture

GHS Signal Words: N/A

GHS Hazard Symbol/Pictogram: N/A

GHS Hazard Statements: N/A

GHS Precautionary Statements:

P302, P340 May be respiratory irritant if inhaled. May cause respiratory tract irritation. Maybe harmful if swallowed or in contact with skin. Wear PPE

Potential Health Effects for:

Inhalation: If inhaled, remove to fresh air. If not breathing, give artificial respiration. If breathing is difficult, give

oxygen. Good hygiene practice requires that exposure be kept to a minimum and that suitable control

measures be used in an occupational setting.

Ingestion: If swallowed, wash out mouth with water provided person is conscious. Call a physician.

Skin: In case of contact, immediately wash skin with soap and copious amount of water.

Eyes: In case of contact, immediately flush eyes with copious amounts of water for at least 15 minutes.

Chronic Exposures: No information available. We recommend limiting prolonged exposure.

Target Organs: No information available

HMIS Classification

Health hazard: 0

Chronic Health Hazard: 0

Flammability: 0
Physical hazards: 0

NFPA Rating

Health hazard: 0

Fire: 0

Reactivity Hazard: 0

3. Composition

Ingredients/Components:

Chemical Name: Fmoc - γ - trityl - L - β – homoasparagine;

Fmoc - beta - homoAsn(Trt) - OH Molecular formula: C39H34N2O5

Molecular weight: 610.7

CAS-No 283160-20-3

EC-No N/A

4. First Aid Measures

Inhalation:	If dust is inhaled, remove from contaminated area. Encourage patient to blow nose to ensure clear passage of breathing.	
	If irritation or discomfort persists seek medical attention.	
Ingestion:	If swallowed do NOT induce vomiting.	
	If vomiting occurs, lean patient forward or place on left side (head-down position, if possible) to	
	maintain open airway and prevent aspiration.	
	Observe the patient carefully.	
	Give water to rinse out mouth, then provide liquid slowly and as much as casualty can comfortably	

Toll-Free: 800-452-5530 • Tel: 510-791-9560 • Fax: 510-791-9573

	drink.				
	Seek medical advice.				
Skin:	If skin or hair contact occ				
		Flush skin and hair with running water (and soap if available).			
-	Seek medical attention in event of irritation.				
Eyes:		If this product comes in contact with the eyes:			
	Wash out immediately with fresh running water.				
		Ensure complete irrigation of the eye by keeping eyelids apart and away from eye and moving the eyelids by occasionally lifting the upper and lower lids.			
	If pain persists or recurs	seek medical attention.			
5. Fire Fig	hting Measures				
Extinguishi		Water spray or fog.			
Launguismi	ng meuu.	Alcohol resistant foam.			
		Dry chemical powder.			
		BCF (where regulations permit).			
		Carbon dioxide			
Special fine	fighting procedures:	Alert Emergency Responders and tell them location and nature of			
speciai jire	ngming procedures.	hazard.			
		Wear breathing apparatus plus protective gloves.			
		Prevent, by any means available, spillage from entering drains or water			
		course.			
		Use water delivered as a fine spray to control fire and cool adjacent			
		area.			
		DO NOT approach containers suspected to be hot.			
		Cool fire exposed containers with water spray from a protected			
		location.			
		If safe to do so, remove containers from path of fire.			
		Equipment should be thoroughly decontaminated after use.			
Unusual fire and explosions hazards:		Emits toxic fumes under fire conditions			
(A!]	4-1 Deleges Measures	<u> </u>			
	tal Release Measures				
Spill respon		Il ignition sources.			
		Clean up all spills immediately.			
		Avoid contact with skin and eyes.			
		ersonal contact by using protective equipment.			
		Use dry clean up procedures and avoid generating dust. Place in a suitable, labeled container for waste disposal			
Containment	nt Avoid all 1	Avoid all personal contact, including inhalation.			
		Wear protective clothing when risk of exposure occurs.			
		Use in a well-ventilated area.			
		DO NOT enter confined spaces until atmosphere has been checked.			
		DO NOT allow material to contact humans, exposed food or food utensils.			
		tact with incompatible materials.			
		dling, DO NOT eat, drink or smoke.			
		Keep containers securely sealed when not in use.			
		Avoid physical damage to containers.			
		ash hands with soap and water after handling.			
	Use good	occupational work practice.			

	following setting ignition source	ners may contain residual dust which has the potential to accumulate cling. Such dusts may explode in the presence of an appropriate see. drill, grind or weld such containers	
PPE	Use personal	protective equipment	
	11	F	
7. Handling and Stora	nge		
Store at 4 °C desiccate	ed and protected from	light. Store away from oxidizing agent.	
8. Exposure Controls	/ Personal Protection	n	
Engineering controls	even when particular mutual friction. Exhaust ventilation particulates in the value of local erespiratory protection (a): particle dust result (b): filter respirator (c): fresh-air hoods Build-up of electror grounding. Powder handling exadditional protection Air contaminants gin turn, determine the remove the contamination.	Local exhaust ventilation is required where solids are handled as powders or crystals; even when particulates are relatively large, a certain proportion will be powdered by mutual friction. Exhaust ventilation should be designed to prevent accumulation and re-circulation of particulates in the workplace. If in spite of local exhaust an adverse concentration of the substance in air could occur, respiratory protection should be considered. Such protection might consist of: (a): particle dust respirators, if necessary, combined with an absorption cartridge; (b): filter respirators with absorption cartridge or canister of the right type; (c): fresh-air hoods or masks Build-up of electrostatic charge on the dust particle, may be prevented by bonding and grounding. Powder handling equipment such as dust collectors, dryers and mills may require additional protection measures such as explosion venting. Air contaminants generated in the workplace possess varying "escape" velocities which, in turn, determine the "capture velocities" of fresh circulating air required to efficiently	
PPE	Use personal protec	ctive equipment	
9. Physical and Chemi	cal Properties		
Physical State	N/A		
Odour State	Not available		
Solubility in Water	Not available		
Specific Gravity	Not available		
nH	Not available		
Boiling Point			
	Not available	Not available	
Melting Point			
Flash Point Vapor Pressure:		N/A	
Vapor Pressure: Vapor Density:		N/A N/A	
vapor Density.	1 N /A		
10. Stability and Read	<u>etivity</u>		
Thermal Decomposition		No data available	
Dangerous Products of Decomposition		No data available	
Dangerous Pagations		COv NOv when hurned	

COx, NOx when burned

Dangerous Reactions

Keep container tightly closed in a dry well-ventilated place. Store in 4°C refrigerator.

11. Toxicological Information

N/A
No information available.
Although ingestion is not thought to produce harmful effects, the material may still be damaging to the health of the individual following ingestion, especially where pre-existing organ (e.g. liver, kidney) damage is evident. In an occupational setting however, ingestion of insignificant quantities is not thought to be cause for concern.
Not available
No significant acute toxicological data identified
N/A
N/A

Reproductive Toxicity: No information available

12. Ecological Information

No information available.

13. Disposal Considerations

All waste must be handled in accordance with local, state and federal regulations. Legislation addressing waste disposal requirements may differ by country, state and/ or territory. Each user must refer to laws operating in their area. In some areas, certain wastes must be tracked.

14. Transport Information

Hazard Class	N/A	
Identification Number	N/A	
Packing Group	N/A	
Proper Shipping Name (DOT)	N/A	

15. Regulatory Information

California Proposition 65: N/A

US TSCA (Toxic Substance Control Act): N/A

US CERCLA (Comprehensive Environmental Response, Compensation, and Liability Act: N/A

US SARA Title III (Superfund Amendments and Reauthorization Act: N/A

US Other: N/A

EC EINICS (European Inventory of Existing Commercial Chemical Substances) Number: N/A

EC Risk Statements: N/A

Other Country Regulations: N/A

16. Other Information

AnaSpec Inc.

It is not intended for food, drug, household, agricultural or cosmetic use. A technically qualified individual experienced in handling potentially hazardous chemicals must supervise its use. The above information is believed to be correct but does not purport to be all inclusive and shall be used only as a guide. Users should make independent decisions regarding completeness of the information based on all sources available. AnaSpec shall not be held liable for any damage resulting from handling or from contact with the above product.
