Revision Number: 4.0					
1. Product and Company Identification					
Product Name:	CEF Control Peptide Pool				
	CEF Control Peptide Pool				
Manufacturer/Supplier:	AnaSpec, Inc.				
	www.anaspec.com				
	34801 Campus Drive				
	Fremont, CA 94555				
	Tel: 510-791-9560				
	Fax: 510-791-9572				
	Email: <u>service@anaspec.com</u>				
	Kaneka Eurogentec SA,				
	Rue du Bois Saint Jean 5 4102 Seraing Belgium				
	Tel. +32-4-3727400				
	Fax. +32-4-3727500				
	E-mail info@eurogentec.com				
	Kaneka Eurogentec Helpdesk				
	Tel. +32-4-3727665				
Catalog Number	AS-61036-025				
Relevant identified uses of the substance/preparation and uses advis against	For laboratory use only.				
Emergency information	Please contact the regional Eurogentec representation in you				
	country or Kaneka Eurogentee S.A. directly (from 8 am to 6				
	pm)				

# Safety Data Sheet (SDS)

*Emergency Overview:* We do recommend handling all chemicals with caution. Use proper protective equipment (PPE) when handling chemicals. To our knowledge, the hazards of this material have not been thoroughly investigated.

GHS Hazard Classification:

GHS Physical Hazards:Not a dangerous substance according to the GHSGHS Health and Environmental Hazards:Not a dangerous substance according to the GHS

GHS Signal Words: None

GHS Hazard Statements: None

GHS Precautionary Statements: None

Potential Health Effects for:

*Inhalation:* If inhaled, remove to fresh air. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Good hygiene practice requires that exposure be kept to a minimum and that suitable control measures be used in an occupational setting.

Ingestion: If swallowed, wash out mouth with water provided person is conscious. Call a physician.

Skin: In case of contact, immediately wash skin with soap and copious amount of water.

Eyes: In case of contact, immediately flush eyes with copious amounts of water for at least 15 minutes.

Chronic Exposures: No information available. We recommend limiting prolonged exposure.

Target Organs: No information available

HMIS Classification

Health hazard: 0 Chronic Health Hazard: 0 Flammability: 0 Physical hazards: 0

4. First Aid	Measures
	Measures If dust is inhaled, remove from contaminated area.
4. First Aid Inhalation:	If dust is inhaled, remove from contaminated area.
Inhalation:	If dust is inhaled, remove from contaminated area. Encourage patient to blow nose to ensure clear passage of breathing. If irritation or discomfort persists seek medical attention.
Inhalation:	If dust is inhaled, remove from contaminated area.   Encourage patient to blow nose to ensure clear passage of breathing.   If irritation or discomfort persists seek medical attention.   If swallowed do NOT induce vomiting.
Inhalation:	If dust is inhaled, remove from contaminated area. Encourage patient to blow nose to ensure clear passage of breathing. If irritation or discomfort persists seek medical attention.
Inhalation:	If dust is inhaled, remove from contaminated area.   Encourage patient to blow nose to ensure clear passage of breathing.   If irritation or discomfort persists seek medical attention.   If swallowed do NOT induce vomiting.   If vomiting occurs, lean patient forward or place on left side (head-down position, if possible) to maintain open airway and prevent aspiration.   Observe the patient carefully.
Inhalation:	If dust is inhaled, remove from contaminated area.   Encourage patient to blow nose to ensure clear passage of breathing.   If irritation or discomfort persists seek medical attention.   If swallowed do NOT induce vomiting.   If vomiting occurs, lean patient forward or place on left side (head-down position, if possible) to maintain open airway and prevent aspiration.   Observe the patient carefully.   Give water to rinse out mouth, then provide liquid slowly and as much as casualty can comfortably

1

Extinguishing media:		Water spray or fog.
		Alcohol resistant foam.
		Dry chemical powder.
		BCF (where regulations permit).
		Carbon dioxide
Special firefighting procedures:		Alert Emergency Responders and tell them location and nature of
		hazard.
		Wear breathing apparatus plus protective gloves.
		Prevent, by any means available, spillage from entering drains or water
		course.
		Use water delivered as a fine spray to control fire and cool adjacent
		area.
		<b>DO NOT</b> approach containers suspected to be hot.
		Cool fire exposed containers with water spray from a protected location.
		If safe to do so, remove containers from path of fire.
		Equipment should be thoroughly decontaminated after use.
Unusual fire and explosions hazards:		Emits toxic fumes under fire conditions
6. Accidental Release M	<u>leasures</u>	
Spill response		l ignition sources.
		ll spills immediately.
	Avoid contact with skin and eyes.	
		rsonal contact by using protective equipment.
		ean up procedures and avoid generating dust.
		suitable, labeled container for waste disposal
Containment		personal contact, including inhalation.
		ective clothing when risk of exposure occurs.
		ell-ventilated area.
		enter confined spaces until atmosphere has been checked.
	DO NOT allow material to contact humans, exposed food or food uter	
		tact with incompatible materials.
	When handling, DO NOT eat, drink or smoke.	
	Keep containers securely sealed when not in use.	
	Avoid physical damage to containers.	
	Always wash hands with soap and water after handling.	
	Use good occupational work practice.	
	Empty containers may contain residual dust which has the potential to accumula	
	following settling. Such dusts may explode in the presence of an appropriate ignition	
	source. Do NOT cut, drill, grind or weld such containers	
		-
PPE	Use person	nal protective equipment

Γ

Store at -20 °C, dry desiccated and protected from light. Store away from oxidizing agent.

8. Exposure Controls	
Engineering controls	Local exhaust ventilation is required where solids are handled as powders or crystals;
	even when particulates are relatively large, a certain proportion will be powdered by mutual friction.
	Exhaust ventilation should be designed to prevent accumulation and re-circulation of particulates in the workplace.
	If in spite of local exhaust an adverse concentration of the substance in air could occur, respiratory protection should be considered. Such protection might consist of:
	<ul><li>(a): particle dust respirators, if necessary, combined with an absorption cartridge;</li><li>(b): filter respirators with absorption cartridge or canister of the right type;</li></ul>
	(c): fresh-air hoods or masks
	Build-up of electrostatic charge on the dust particle, may be prevented by bonding and grounding.
	Powder handling equipment such as dust collectors, dryers and mills may require additional protection measures such as explosion venting.
	Air contaminants generated in the workplace possess varying "escape" velocities which,
	in turn, determine the "capture velocities" of fresh circulating air required to efficiently
	remove the contaminant.
PPE	Use personal protective equipment

## 9. Physical and Chemical Properties

Γ

Physical State	Solid
Odour	Not available
Solubility in Water	Not available
Specific Gravity	Not available
рН	Not available
Boiling Point	Not available
Melting Point	Not available
Flash Point	N/A
Vapor Pressure:	N/A
Vapor Density:	N/A

## 10. Stability and Reactivity

Thermal Decomposition	No data available
Dangerous Products of Decomposition	No data available
Dangerous Reactions	COx, NOx when burned

Keep container tightly closed in a dry well-ventilated place. Store in -20 °C, dry refrigerator.

#### 11. Toxicological Information

RTECS Number	N/A
Toxicity	No information available.
Health Hazards	Although ingestion is not thought to produce harmful
	effects, the material may still be damaging to the
	health of the individual following ingestion, especially
	where pre-existing organ (e.g. liver, kidney)
	damage is evident. In an occupational setting however,
	ingestion of insignificant quantities is not thought to be
	cause for concern.
Potential Hazards	Not available

### AnaSpec Inc.
